

Vaccine Tracking & COVID Testing Vendors & Pricing

Our Employee Wellness division has been in communication with a number of vendors about their vaccine tracking & COVID testing services and pricing. What you see below is a summary of our findings to date (writing this as of November 4, 2021).

Please note – there are many tools and vendors out there - this is not an all-encompassing list and vendors are listed in no particular order.

Additionally, we've been hearing there is a lot of fluctuation in the market with tests, availability, and pricing so the information and pricing is subject to change.
